## Component Entry Screen

The claim component entry user interface has been completely redesigned to enhance the user's experience. The changes manifest after saving the 3 Cs, the component entry screen automatically opens. Users can now enter multiple parts on the same page, eliminating numerous steps and shortening the submission process.

Please take note of the following:

1. Under the **Part #** (**1**) heading, click **+Add** to open a component line. Enter the component's part number, for brands with auto-populating part numbers, the price will populate automatically after entering the part number.

2. Under the **Type** (**2**) heading, choose the system type of the component by clicking the downward arrow to open the drop down menu.

3. Under the **Code** (**3**) heading, choose the sub-system of the component by clicking the downward arrow to open the drop down menu.

4. Under the **Status** (**4**) heading, users can indicate if a component will be denied. (Mostly used internally)

5. Under the **Reason** (**5**) heading, the reason for the denial would be indicated if a component is denied.

6. Under the **Cost Type** (**6**) heading, choose **Warranty cost**, **Dealer Cost**, or **Retail Cost** if applicable.

7. Under the **Unit Price** (**7**) heading, pricing will auto-populate for brands with that option. If not, it is an editable field, the component price can be entered here.

8. Under the **QST/PST** (**8**) heading is where taxes are shown. Each province has its own designation.

9. Under the **Rate Type** (**9**) heading, users can choose the type of labor needed, either **Retail - Standard**, **Warranty - PPM**, **Warranty - Standard**, or **Flat**.

10. In case of a flat **Rate** (**10**), users can enter an mount in this field.

11. Under the **Hours** (**11**) heading, users can specify time units per repair.

12. In the event that the labor is sublet, users must check the box under the **Sublet** (**12**) heading.

13. The fields under the **Description** (**13**) heading are editable, branded contracts with auto-populating part numbers will include a short description of the component.
